## SUMMARY

Junior Software Developer with **1+ years** of professional experience in Node.js, Vue.js, and AngularJS at StoreHippo, delivering web applications, backend services, and AI-integrated features for clients including Amul, Hero MotoCorp, Syngenta, Dow MasterConnect, and others. Additional hands-on experience in Python and Django through projects spanning computer vision, prompt optimization, and REST API integration.

## EDUCATION

**Bachelor of Engineering in Computer Science**, Rajeev Institute of Technology

2021–2025

CGPA: 9.17

## SKILLS

**Languages:** Python, Java, JavaScript, C, C++

**Technologies:** Node.js, Express.js, AngularJS, Vue.js, Django, OpenCV, HTML, CSS

**Databases:** MySQL, MongoDB

**Testing:** Mocha, Chai, Puppeteer

**Tools:** Git, GitHub, Docker, CI/CD (GitHub Actions), Figma, Socket.IO, Jira, Claude Code, Scrum

## EXPERIENCE

### Junior Software Developer

Jun 2025–Present

Hippo Innovations Pvt Ltd (StoreHippo)

Gurgaon, Haryana (Remote)

- Redesigned the seller onboarding flow in Figma and implemented UI changes for Mystore (ONDC), increasing completion rates by **89%** and recovering **8,000+** abandoned KYC submissions by reducing completion time from several hours to under **2 minutes**.
- Built AI-powered seller tools covering order analytics, product collections, data exports, and natural language querying; improved Help Center self-service by adding an AI bot to summarize and clarify user's queries, rewriting documentation, and producing video guides.
- Developed an AI buyer support chatbot that automated responses to buyer queries, reducing support workload; built an AI-based dimension prediction system that auto-validated shipping data, ensuring accurate logistics records.
- Used prompt optimization and token optimization techniques with Claude Code to improve code generation quality and speed up feature development.
- Integrated WhatsApp Business API for seller campaigns with real-time template failure monitoring; added Socket.IO in-app notifications, SMS and email notifications, and Surepass Video KYC for semi automated identity verification.
- Wrote automated test cases using Mocha, Chai, and Puppeteer to validate backend services and end-to-end application workflows.
- Resolved production bugs and delivered client-specific requirements across live systems while contributing to the AngularJS-to-Vue.js frontend migration.

### Full Stack Web Developer Intern

Dec 2023–Jan 2024

Varcons Technologies Pvt. Ltd.

Bengaluru, Karnataka

- Developed a full-stack web application for Ignyt – The Beer Lounge using Django, HTML/CSS/JS, and SQLite, improving UI responsiveness and client data management.

## PROJECTS

### AI Trip Planner

[github.com/ModhakNatesh/ai-trip-planner](https://github.com/ModhakNatesh/ai-trip-planner)

- Developed a full-stack AI-powered travel planning application using React.js, Node.js, and Express.js that generates personalized day-by-day itineraries based on destination, budget, duration, and user preferences.
- Integrated Vertex AI for itinerary generation and Google Maps API for location-based recommendations, route planning, hotels, activities, and real-time travel information through backend API workflows.

### Inspyr AI

[github.com/Sharan-m-04/Inspyr-AI](https://github.com/Sharan-m-04/Inspyr-AI)

- Developed a generative AI platform using Django, Python, and OpenAI APIs that enables users to generate websites, images, and documentation from text prompts.
- Built modular backend workflows including dashboard management, prompt processing pipelines, and real-time rendering for AI-generated outputs.

### Object Recognition System

[github.com/Sharan-m-04/object-recognition-through-image-processing](https://github.com/Sharan-m-04/object-recognition-through-image-processing)

- Developed a computer vision application using Python, OpenCV, NumPy, and SSD MobileNet V3 to detect and classify objects from images in real time.

- Implemented image preprocessing, feature extraction, and deep learning-based object detection using the COCO dataset for image recognition workflows.

## **CERTIFICATIONS**

---

Oracle OCI 2025 Generative AI Professional

Oracle OCI 2025 AI Foundations Associate

The Joy of Computing Using Python – NPTEL (IIT Madras)

Python Web Developer – ICT Academy

## **ACHIEVEMENTS & ACTIVITIES**

---

Winner – UI/UX Design Hackathon

Host and Coordinator – TechKriti '24 (State-level Tech Fest); organized Design-a-thon and Code Sprint events

Runner-up – Coding Hackathon, Tech Connect 2K23

Published author of *UI/UX Lab Manual: A step-by-step guide to creating interactive designs in Figma*

Editor – College Magazine and Department Newsletter
